Final Note by the First Member of Council.

Subject:—

Hospital for the Iron Works.

---

26) His Highness was on 13th September 1919 pleased to sanction the posting of an Assistant Surgeon to Benkipur in place of the Sub Assistant Surgeon there - in view of the growing importance of the place and orders have been issued accordingly.

27) When I visited Benkipur in July last, the Company's Officers urged the necessity of constructing a pukka hospital at Benkipur and the Special Officer has submitted plans and estimates for constructing the same at a cost of about Rs. 44,000. The Chief Engineer and the Senior Surgeon will be consulted and the question submitted for the orders of His Highness in due course.

28) In the meantime, the Company's Officers have represented that many of the men employed at the Iron Works are sick and in need of treatment and that the present Assistant Surgeon at Benkipur is not able to attend to them owing to the large area over which he has to attend to patients etc., and request that a full time Medical man may be posted at once for the Iron Works.

29) The subject was considered in Council who are of opinion that the Assistant Surgeon at Benkipur may hereafter be asked to attend solely to the employees at the Iron Works and that a Sub Assistant Surgeon may be posted for the charge of the Dispensary.

30) The Special Officer and the Senior Surgeon will be asked to take all necessary action re accommodation, staff etc., in the matter. The resolution of the Council may be graciously approved.

FROM

THE SPECIAL OFFICER,
MYSORE IRON WORKS,
BENKIPUR (SHIMOGA DISTRICT).

To

THE SECRETARY TO GOVERNMENT OF
HIS HIGHNESS THE MAHARAJA OF MYSORE,
DEPARTMENTS OF EDUCATION AND AGRICULTURE,
BANGALORE.

SIR,

In submitting herewith for favour of instructions copies of correspondence exchanged between Mr. Richardson and Mr. Marshall re: the construction of a Hospital, I have the honour to state as follows:-

The General and Construction Superintendent requested, on the 7th December 1919, the Agents to sanction an expenditure of Rs.4,500 for the construction of temporary hospital and Doctor's Bungalow on work for use during construction period. In reply, the Agents in their letter No. My.470/20(copy enclosed) pointed out to the Superintendent that if Rs.4,500 were to be expended on Temporary hospital, they were afraid the estimate for Rs.10,000 provided in Government Order No. C.75-8/I.&.C.6-19 dated 6th October 1919 for a permanent Hospital would burst and that because they had not the approval of the Special Officer for the expenditure, they would place the matter before the Board.

As per Agents' letter No. My.471/19, I took up the question with Mr. Richardson and replied to the Agents that a temporary building at such a high cost was unnecessary and that when the construction of the buildings of the New Town would be put on hand, the building for the hospital might be the first to start with, the erection of which could be completed within 4 months

months from the date of construction with full equipment.

Mr. Richardson again enquired on the 16th December if it was our idea that the hospital should be used by the different departments of the Scheme; in which case, he was of opinion that the plans for the hospital should be enlarged and that other departments should bear their proportionate share of the construction cost.

I therefore referred the matter to the Committee Members and it was resolved that the factory hospital would not ordinarily be used by the Government Departments and it was therefore unnecessary to consider an increase on hospital accommodation on this account more than what had already been provided.

Dr. Smeeth reported that there is no likelihood of his using the hospital at Benkipur, while the Agent, Mysore Railways, stated that though the staff of his Department would be located at Benkipur, it will be too small to be taken into account. The Mysore Railways Department maintain a Doctor of their own and a Dispensary at Tarikere. The Conservator of Forests has replied to the effect that he sees no reason why his Department should bear any portion of the cost of construction since only labour that might be employed at Benkipur was meant for the development of the Iron Works.

The Heads of the Departments concerned, when they discussed the question at the Committee Meeting, were of opinion that ordinarily if at all, any medical help was required by their staff, they can obtain the same from the Local Fund Dispensary at Benkipur. Benkipur has a bright future and it may be well to consider carefully its future requirements also and an hospital so designed as to be able to lend itself for future extensions.

I have the honour to be,
Sir,
Your most obedient servant,

Special Officer, Mysore Iron Works.

8th. December 1919.
Tour

Mly. 470/19.

To
The General and Construction Superintendent,
Mysore Iron Works,
BHADRAVATHI.

Dear Sir,

Temporary Hospital and Doctor's Bungalow.

We have received this morning your telegram dated the 7th. instant reading as follows:-

"19. Please wire sanction expenditure Rs. 4700, construction temporary hospital and doctor's bungalow. Ironco."

As we have had no intimation that the Special Officer has approved of this expenditure, we are awaiting your letter giving full particulars. In any case, the matter would have to go before the Board and we would have to place full particulars before them. We are therefore, also consulting the Special Officer.

At the last Board meeting, on the 20th. October Mr. Luxman Rao informed the Board that satisfactory arrangements were being made for the hospital and equipment and a qualified medical man was being put in charge.

The Mysore Government have recently sanctioned the estimates for the Town, costing Rs five lacs. A copy of the Government Order No. C. 75-8-I & C 6-19 dated the 6th. October is enclosed herewith for ready reference. Mr. Luxman Rao has provided Rs 10,000, for

that

a hospital. There is however a remark detailed plans and estimates were prepared but in view of the limit of the expenditure to Rs five lacs, lower amounts have been entered and plans and estimates to suit these amounts will have to be prepared. We are afraid that if an expenditure of about Rs 4500, is made on a temporary hospital, the sum of Rs 10,000, provided for in the estimates will be exceeded. We also do not find any special provision for quarters for the medical man, or for equipment for the hospital

On receipt of full particulars from you and on receipt of the Special Officer's views, the matter will be placed before the Board for their decision.

Yours faithfully,

Tata Sons, Ltd., Agents,

DY.

Copy of letter No. SM. 687/20 dated 14/15th June 1920 from Mr. Marshall to Mr. Richardson, Re: Hospital.

The enclosed letter No. SM. 685/20 was dictated on the 30th April, but through oversight was not mailed. I enclose herewith two sets of prints of our sketches which Mr. Stammers prepared in consultation with the Doctor. These show the hospital and dispensary which the Doctor considers to be necessary, laid out in a suitable architectural way to conform with the Doctor's requirements and good building construction.

You have very much less accommadation than in Jamshedpur. We have only a small dispensary and the hospital has 16 beds, same as shown on this lay-out. Our segregation camp is small and kutcha.

The conditions here, however, are not at all satisfactory and we have entirely outgrown our hospital accommadations, so that at the present time we are not giving suitable medical service to the community. As you know, we have plans for a very much larger institution and this we will build as soon as we can get an opportunity. The total capacity of the new hospital will be 130 to 150 beds with provisions for the future for 300 beds, the present segregation ward has accommadation for nine beds. In addition to this we will have dispensaries in some sections of the town and may have a branch hospital in the new eastern English town for the Subsidiaries.

Our provision for contagious diseases must be greatly increased, and I think that ample provision must be made in all cases for, if an epidemic of contagious diseases strikes a community we must have suitable accommadations. Non-contagious diseases can be treated more easily even though the cases be serious

As I mentioned in the other letter, I anticipate that you will have a large community to serve in the future and any plan which is adopted now should lend itself readily to extension, or you will be faced with the condition we have here, in which we must begin all over again on a much larger scale. I will suggest that you discuss

discuss this with Mr. Lakshmana Rao, and I think you can adopt a plan for the main hospital somewhat similar to one of the two arrangements which are shown, but with only one half or two thirds of the administrative building and one ward divided by a partition across the middle into portions for men and women. This will give you a building about two-thirds the size of the present one and I believe with ample accommodations for your initial needs. The arrangement which is shown enables extensions to the wards and laboratory, to be made without tearing down anything except a few walls

The sketches for the dispensery I think are too ambitious, certainly this is true at first. The arrangement, however, for waiting and dressing rooms on either side of the central Doctor's room is good, and I think something similar to this can be worked out.

I do not think that you should settle this matter alone, for it is now decided that the headquarters of the Forest Department, the saw mill and the Railways will be at Benkipur, in addition to the Iron Works and therefore a hospital must be built to serve all the Departments and proportionate expenses must be borne by each. I think it will be well for you if you were to discuss this with Mr. Lakshmana Rao and request him to take the matter up with Mr. De Souza if the Iron Works would bear one half of the expense and the other half were divided equally between the Forest Department and the Railways, it probably would represent a fair division. Probably ₹40,000/- would be sufficient to build a satisfactory equipment and this would make the expenditure for each Department comparatively light.

Mr. Gandhy has written to Mr. De Souza explaining the reason for my inability to come to Benkipura, and I can only add that the situation here is just as it was at the time he wrote. The Directors have agreed to come to Jameshedpur to discuss matters on the ground, but they cannot be here until the end of June. I am exceedingly anxious to get to Benkipura and will not delay my coming longer than absolutely necessary.

" C O P Y "

Special Offr.

Copy of letter No. SM.685/20 dated 14th June 1920 from Mr. Marshall to Mr. Richardson.

I have received your letters of the 16th April No. GC.822 and 24th April No. GC.126/21 both enclosing sketches of the proposed hospital. I quite agree with you that it is necessary to build something promptly, and now that the village and other arrangements are reasonably well decided, you can proceed promptly.

I did not like the original sketch because the ward as shown therein was too small and you provided only a dressing room in addition to the ward itself. The second sketch which accompanied your letter of the 24th April provided a number of other facilities which you must have, but after conference with Dr. Chakravarthi, the Company's Physician here, and Mr. Stammers, the Superintending Architect of the new General Office and a man with a wide architectural experience, we have concluded that your last sketch would be materially changed and greatly improved.

The criticisms and suggestions of Dr. Chakravarti and Mr. Stammers can be summarised briefly as follows:-

We have considerd that the plant, railroads, saw mill and one or two other industries which must come to Benkipura such as an enlargement of the foundry and machine-shop facility, the probable paper pulp mill etc., will eventually require a total about 1,000 employees. This with the Town will probably mean more than 2,000 people to be served. Dr. Chakravarti recommends the following:-

1. Women's ward with four beds.
2. Men's ward with eight beds.
3. Separate infectious ward (for Women 6 beds,)
   (for men 6 beds.)
4. Operating room 16ft Sq.
5. Preparation room 12ft x 8 ft.
6. Sterilising room. 8ft x 8ft.
7. Office room 20ft x 12 ft.
8. Doctor's laboratory.

9. Store Room for beds, bedding, etc. 11 ft. Sq.

10. Patients' Bath Room (For men each 8 ft x 10 ft)

(For women " ")

11. Latrine accommodation with 2 seats for men and 2 seats for women.

This does not include accommodation for the infectious Wards

In addition to these rooms in the main building and the infectious ward, there must be kitchen, servants' quarters, sweepers' quarters, etc., The Dr. recommends a separate building for a dispensary, and he does not consider it desirable to have the dressing rooms and dispensary in the same building as the men's wards and offices. For this dispensary, he recommends two dressing rooms, each about 10' x 12' one examination room for about 8' x 12' and combined Chemical Store and Compounding room probably 12' x 16'.

Mr. Stammers concurs in a general way in the suggestion made by Dr. Chakravarti. His contract with the Company terminates about the 24th June and he is engaged in revising the Plans for the General Office Building. Before he leaves, if Bombay considers it necessary, I can arrange to have him make a rough architectural sketch of the building and work out some of the details in collaboration with the Doctor. I am sure this cannot be for five weeks, for Mr. Stammers will be in Bombay during this time.

The total cost of this suggested hospital will be much in excess of the 15,000 rupees which you have estimated for the building shewn on your sketch accompanying your letter of the 24th April and I am not entirely sure that all of these are necessary at the present time.

I am sending a copy of this letter to Mr. Ghandy, which will explain my views in the matter.

"Copy"

Special Officer

Letter No. S.M.686/20 dated 14th June 1920 from Mr. Marshall to Messrs. Tata Iron and Steel Comapny, Bombay.

You will have received copies of Mr. Richardson's letters of April 6th and 24th requesting sanction for a hospital building at Benkipura.

The letter of April 6th showed a building about 39' x 20' x 23' with a 8' verandha around three sides. The estimated cost is Rs.4,000. The sketch accompanying his letter of the 24th shows very much larger building, 77'-3" x 23'-6" with a verandha 12'-0" on one side only, the estimated cost being Rs.15,000.

I am enclosing copy of a note prepared Dr. Chakravarti and Mr. Stammers on a proper Hospital for Benkipur. The cost of such a building will be much in excess of Rs.15,000 and I think that the accommodations which they have suggested are larger than necessary for the present. I believe however that the plans should be drawn so that the hospital may be extended to the suggested capacity in the future. This will avoid the necessity for abandoning the initial building at some future time as will be necessary at Jamshedpur.

Sd. S.M.Marshall.

Sir,

With reference to your letter No.2531-I & C. 8-20, dated 7th September 1920, requiring the Offg. Senior Surgeon to give his views on certain points connected with the proposed construction of a new Hospital at Bonkipur capable of accommodating about 10 emergent cases, I have the honor to state that the Offg. Senior Surgeon appears to have been unable to make out anything from the plans sent with the letter, as they were pale and indistinct and to request that more distinct and readable copies may, if possible, be caused to be sent, when I shall give my opinion on the points mentioned.

I may, however, add that I shall have to consult the Chief Engineer regarding the probable cost of construction and that the annual recurring cost (of maintenance) will be the same, whether the building is a pukka or katcha one, except, perhaps, that a kutcha building may likely involve a little more expenditure on annual repairs.

I have the honor to be,

Sir,

Your most obedient servant,

H. B. Mylvaganam

Ag. Senior Surgeon.

The Secretary,
to the Government of Mysore,
Deptd. of Education & Agriculture,
Bangalore.

Dear Sir,

Medical Arrangement at Benkipur.

Our attention is again drawn to the fact that many men in the General & Construction Superintendent's Office as well as in the Accounts Department at Benkipur have been sick and on account of lack of proper medical treatment at Benkipur are compelled to go to hospitals at Bangalore or Shimoga. As a result, not only the Works suffer but it is also not economical since the men are paid full salary during sickness.

The present doctor, though a competent man, has to perform his duties over so large an area that it is not possible to get proper treatment at Benkipur. We would, therefore, request you to move the Mysore Government to provide a full-time doctor for the Iron Works at Benkipur, without further loss of time.

In this connection, we would remind you that at the Meeting of the Board of Management of the Mysore Iron Works held in Bombay on the 10th August last, the representatives of the Mysore

With reference to your letter No. 3792/I&C.8-20-4 dated the 24th October 1920 requesting me to prepare a plan and estimate for the construction of a suitable -- hospital for the Mysore Distillation and Iron Works, I have the honour to submit herewith the plan which costs Rs.44,000 nearly. The plan was placed before the Members of the Iron Scheme Committee and they approved of the same.

2. The design has also been modified as per instructions given by Mr. S. M. Marshall during his recent visit.

3. The accommodation provided is the minimum for the present needs and the design lends itself for future extension.

I have the honour to be,

Sir,

Your most obedient servant,

T Lakshmana Rao

Special Officer, Mysore Iron Works.

M e m o.

Detailed estimate is not made. The cost is arrived at by assuming Rs.6/- per square foot on the Plinth area which is 7,361 sq.ft. A building of this description with ordinary fittings may cost about Rs.5/- per sq. foot., but this building requires special fittings for certain portions and hence a higher rate of Rs.6/- per square foot is assumed.

Special Officer,
Mysore Iron Works.
